Dear Dan:

Kelly and I would like to thank you for the wonderful landscaping that you recently completed on our new home. We cannot say enough about the breathtaking views that we now have in our front and rear yard and we are still amazed at how the house "came to life" with the beauty of your landscape design.

Most importantly thought, it was truly a pleasure to work with you on this project. I can honestly say that your constant attention to the project and accessibility at every moment, even during a very busy period for you, made this a very enjoyable experience for both of us. With out work schedules it was very difficult to be on top of every phase of the construction, but we never had any reservations about leaving the project in your hands. The results speak for it's self!

Whatever we can say about the project could never convey the true beauty of the plan and the detail in the work. We encourage you to show our home and welcome the opportunity to provide a reference for you in the future. Thanks again.

Sincerely,

Richard J. Wisniewski
